# WellVision™

- WellVision, is our latest development for real time well monitoring, data acquisition using CDPD cell modems or satellite and the Internet as the data highway.

- Move the mouse over the wells to view real-time data.
- When connected to your field via WellVision, WellMax data is stored to your computer for analysis and reporting.
- Control parameters can be remotely adjusted.

- Entire fields are mapped in and wells are monitored in real time.
- This allows more effective management of your people by giving attention to the wells that need it.

TECHNOLOGY YOU CAN COUNT ON
